

Personal Income by State and Region, First Quarter 1995

This article was written by Duke D. Tran and Howard L. Friedenberg. The quarterly estimates of State personal income, as well as the section on the revisions, were prepared by the Regional Economic Measurement Division.

PERSONAL INCOME in the Nation increased 1.8 percent in the first quarter of 1995 after increasing 2.0 percent in the fourth quarter of 1994.¹ In the first quarter, the 1.8-percent increase in personal income exceeded the 0.7-percent increase in U.S. prices (as measured by the fixed-weighted price index for personal consumption expenditures). By State, the increase in personal income exceeded the increase in U.S. prices in 45 States.

The remainder of this article looks at the States with the fastest and slowest growth in personal

income in the first quarter and then briefly describes the revisions to the estimates for 1994. Tables 1 and 2 at the end of the article contain the quarterly estimates of total and nonfarm State personal income, beginning with the first quarter of 1992.

Fastest growing States

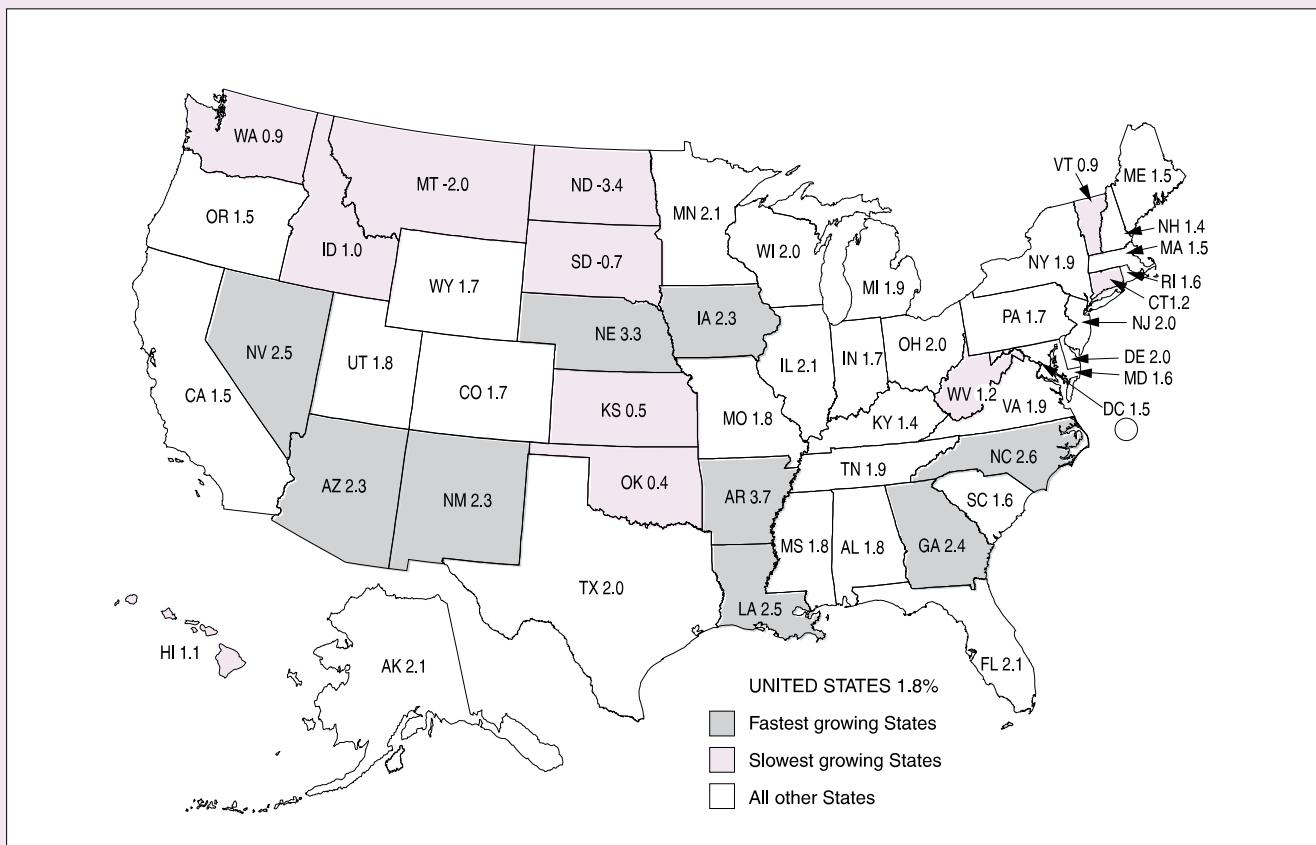

In nine States, increases in personal income were at least 0.5 percentage point more than the U.S. average (table A and chart 1).

In Arkansas, Nebraska, Louisiana, and Iowa, personal income growth was boosted by substantial increases in farm income, reflecting increases

1. In this article, percent changes are at quarterly—not at annual—rates.

CHART 1

Total Personal Income: Percent Change, 1994:IV – 1995:I

in Federal farm subsidy payments from low levels in the fourth quarter of 1994; see **the box** "Note on Federal Farm Subsidy Payments" on this page. In Arkansas and Louisiana, the payments were Federal rice subsidies; in Nebraska and Iowa, the payments were Federal corn subsidies. In addition, all four States had above-average increases in payrolls in the finance, insurance, and real estate group, and most had above-average increases in payrolls in durable goods manufacturing and in services.²

In North Carolina, the fast growth in personal income mainly reflected a large increase in farm income excluding farm subsidies. In addition, increases in payrolls were above average in both durable and nondurable goods manufacturing, in mining, in the finance, insurance, and real estate group, and in government.

In Nevada, Georgia, Arizona, and New Mexico, increases in payrolls were above average in durable goods manufacturing, in services, and in government. In most of these States, increases in payrolls were also above average in nondurable goods manufacturing and in construction.

Slowest growing States

In eight States, increases in personal income were more than 0.5 percentage point below the U.S. average increase of 1.8 percent; in South Dakota,

2. In this article, an increase in an industry's payrolls in a State is "above average" ("below average") if it is more than (less than) the 1.8-percent increase in the Nation's personal income.

Note on Federal Farm Subsidy Payments

In States in which farm income accounts for a significant share of total personal income, the volatility of farm income can substantially affect quarterly movements in State personal income. A major source of this volatility is Federal subsidies paid to farmers under various price-support and land-conservation programs: Each eligible crop is under a different subsidy program, and the subsidies are not paid out evenly over the year. The following tabulation illustrates the effects of recent changes in farm income in Iowa, which mainly reflected the quarterly pattern of payments on the corn crop:

[Percent change from preceding quarter at quarterly rate]

	1994			1995
	II	III	IV	I
Total personal income	0	-0.1	4.2	2.3
Nonfarm	1.7	1.6	2.1	1.7
Farm	-24.5	-32.9	65.1	12.2

Montana, and North Dakota, personal income declined.

In Montana, North Dakota, Idaho, Washington, Kansas, and Oklahoma, farm income fell, reflecting large declines in Federal wheat subsidy payments. In South Dakota, farm income excluding subsidies declined. In addition, in most of these States, payrolls either declined or increased at below-average rates in nondurable goods manufacturing, in mining, in the transportation and public utilities group, and in trade.

Table A.—Percent Change in Selected Components of Personal Income for Selected States and the United States, 1994:IV-1995:I

Rank		Personal income			Wage and salary disbursements (payrolls)

50	North Dakota	-3.4	-46.7	1.4	6.5	-2.5	-1.0	-5.5	-1.1	.8	.7	3.4	1.7	1.5

In Connecticut, West Virginia, Hawaii, and Idaho, payrolls either declined or increased at below-average rates in nondurable goods manufacturing, in mining, in trade, and in services. In addition, in most of these States, payrolls either declined or increased at below-average rates in construction and in government.

Revisions to the State Personal Income Estimates

As is usual in July, the annual and quarterly estimates of State personal income for the preceding year have been revised to incorporate newly available unemployment insurance tabulations of wages and salaries for the fourth quarter from the Bureau of Labor Statistics (BLS). As a result of the revisions to wages and salaries, the U.S. total of State personal income for 1994 is \$28.9 billion lower than the \$5,677.8 billion published in the April 1995 SURVEY OF CURRENT BUSINESS.³

³. Because of differences in the timing of incorporating these source data, the change in the U.S. total of the State estimates of wages and salaries for

Data Availability

Quarterly estimates for the years 1969–91 are available from the Regional Economic Information System, Regional Economic Measurement Division, BE-55, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or e-mail reis.remd@bea.doc.gov, or call (202) 606-5360.

All industries covered by the BLS tabulations of wages and salaries were revised down, largely reflecting yearend bonus payments that were lower than anticipated.

Table B shows that for each State except North Dakota, the annual estimate of personal income was revised down; the largest percent revisions were to New York, Illinois, Connecticut, New Jersey, and Indiana. All regions except New England had downward revisions in each quarter.

Tables 1 and 2 follow. 

1993–94 is now about \$40 billion less than the corresponding change in the national income and product accounts estimate; see the box on page 7.

r Revised.
p Preliminary.

^a Preliminary.

1. The third-quarter 1992 estimates of nonfarm personal income reflect the losses resulting from damage caused by Hurricane Andrew in Florida and Louisiana and by Hurricane Iniki in Hawaii.

2. The third-quarter 1993 estimates of nonfarm personal income reflect the losses resulting from damage caused

3. The first-quarter 1994 estimates of nonfarm personal income reflect the losses resulting from damage caused by floods in Illinois, Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota, and Wisconsin.

NOTE.—Nonfarm personal income is total personal income less farm earnings.

NOTE: Nonfarm personal income is total personal income less farm earnings.
